The MON-dMEV100 range continuous running fan has been designed for kitchens, utilities and bathrooms. Two models are available, HT humidistat with timer and standard. Both come with adjustable trickle speeds between 5-30l/s with a maximum boost of 35l/s. The HT fan has an adjustable dynamic ambient response humidity sensor and an adjustable timer between 1 and 30 minutes. The S standard version is boosted by a switched live or a remote button. Both versions are IPX5 suitable for Zone 1.
